Winter is right around the corner! We would like to remind residents of the importance of winterizing your homes to protect the water supply. Hoses must be disconnected from your house even if it is presumed drained.

Any remaining water in a hose that is connected to your house could freeze up and expand into the house and could rupture water pipes. When a pipe ruptures within the City of Saxman that will lead to a Tremendous loss of water. This must be taken seriously. One pipe break in your home can drain the water supply and leave the occupants with a costly repair.
